Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-6, 11, 14, 16, 18, 20, 23, 26 and 28, drawn to a method for electrode formation, classified in class 205, subclass 223.
- II. Claims 7-9, 12, 21, 24 and 29, drawn to a method of electrode formation, classified in class 205, subclass 118.
- III. Claims **30** and **31**, drawn to an apparatus for electrodeposited film formation, classified in class 204, subclass 242.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, or different effects.

Group I is directed to a method requiring the step of etching of the whole surface of the insulator substrate, i.e., insulator substrate/electrode conductive thin film/electrode.

Group II is directed to a method requiring the etching an insulator thin film.

The method of each Group is distinct.

Application/Control Number: 10/082,228

Art Unit: 1753

Inventions I-II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as a non-etching apparatus.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for Groups I-III are not required for each other, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1753

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
